INSTALLATIONS

METHOD

01 / MEASURE

Free on-site energy analysis. We measure voltage, power and consumption to calculate your real saving potential.

02 / OPTIMISE

Voltage optimisation and peak shaving are installed. The technology carries a 15-year warranty and roughly 40-year lifespan — 38,000+ installations worldwide.

03 / VERIFY

Savings are tracked in VOE Control with actual kWh and currency. Typical payoff: 24–48 months.

THE SYSTEM FAMILY

VOE Volt

Active voltage optimisation that protects motors and electronics.

VOE Balance

Dynamic phase balancing that uses your full fuse capacity.

VOE Control

Central portal for monitoring, control and deep analytics.

VOE Peak

Shave costly peak demand via smart load control.

VOE Meter

High-precision metering that catches what standard meters miss.

VOE Carbon

Automated CO2 reporting based on actual consumption.

FOR WHOM?

Properties

6–14% LOWER POWER COST

Retail chains

SCALABLE SAVING ACROSS EVERY STORE

Power-intensive industry

SHORTER PAYOFF ON LARGE LOADS

EXAMPLE: ANNUAL SAVING: €17,500.00

BOOK A FREE ANALYSIS

We quantify your saving potential in kWh and currency before you commit.
